  - \$36,500 Total Donation
- AED
  - Medical Device – Analyzes Heart's Rhythm
  - Electrical Shock to Re-Establish Effective Rhythm

# EQUIPPING MANHATTAN BEACH WITH LIFE-SAVING DEVICES

**Sudden Cardiac Arrest is a life-threatening emergency that occurs when the heart unexpectedly stops beating.**

Sudden Cardiac Arrest affects more than 356,000 people outside hospitals each year in the U.S. It strikes seemingly healthy people of all ages, including 7,000 children and teens.

*Sudden Cardiac Arrest (SCA) leads to death within minutes if the person does not receive immediate help.*

Survival depends on the quick actions of people nearby to call 911, start CPR, and use an AED\* to restart the heart.

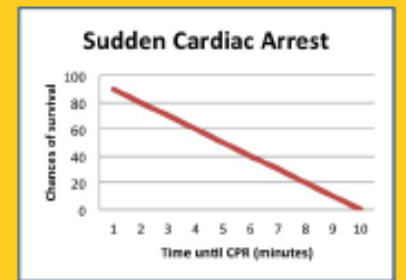

\*Automated External Defibrillator

*Today only 1 in 10 victims survives SCA, but 5 in 10 could survive if bystanders gave CPR and used AEDs immediately.*

**The chances of survival from SCA decrease by 10% every minute without CPR.**

# EQUIPPING MANHATTAN BEACH WITH LIFE-SAVING DEVICES

- Police Officers
  - First on Scene
  - Trained in Emergency CPR & AEDs
  - AEDs Provide Verbal Commands
